▸ 12mm High Definition Laminate Flooring

greenearth™ brand laminate flooring uses advanced 'high definition' print technology, which gives our floor the authentic look of real timber floors.   We also use 12mm moisture resistant HDF core board, with wax impregnated edges, giving this floor superior strength and long term performance.

▸ 'Long Board' length

Our 12mm range includes the latest innovation in laminate flooring – the 'long board' look. greenearth™ 'long board' laminate is now 2.2 meters long, which compliments our realistic timber imagery by adding a realistic size board.

▸ Patented 2G 'drop Lock' laying system.

greenearth™ utilizes the Välinge (see **www. valinge.se** for details.) 2G drop lock system, which allows for fast & efficient laying. The long sides 'angle lock' together, whilst the butt ends simply fold down vertically - making laying a breeze, without compromising on strength and durability

2G
Licensed by Välinge

▸ 25 Year Residential Wear Warranty

Due to our advanced coating technology, our product comes with a 25 year wear warranty, giving you long term peace of mind. (see **www.goldenfield.com.au** for details.)
